(54) Title: PRODUCT DATA EXCHANGE

(57) Abstract: A product data exchange system 300 is used for exchanging technical product data between respective computer systems (310, 320, 340, 360) of a plurality of collaborating companies. At least a computer system (310) of a first one of the collaborating companies includes a plurality of distinct data management systems (312, 314, 316), such as CAD, PLM, ERP, each for creating respective technical product data. The system (310) also includes an editing system (318) for importing technical product data relating to a userselectable project from a plurality of the data management systems, creating an exchange package representing user-selectable parts of the imported technical product data; and providing the exchange package to a computer system located at at least one of the other collaborating companies.
